BScBI-CG Exercises: Assessment criteria

ITEM	Grades				Percent
	0-5	**5-7**	**7-9**	**9-10**	
Template & MarkDown	Does not use properly the MarkDown template. Document may compile but PDF shows It is clearly ill formatted. Cannot open the PDF final report. MarkDown or PDF file was not submitted (both were requested).	MarkDown template compiles and produces right PDF output. No new features were added, the template is used as is provided. Figures and tables embed into same template.	Markdown template compiled into right PDF output. Some changes on the initial template to improve the final report. Figures and tables were provided as external LaTeX files.	MarkDown template has been extended with further MarkDown syntax elements and/or LaTeX macros/modules.	20
Code (shell, perl, python, R, ...)	There are missing code blocks. The student has not run all the commands from code blocks that are already provided as example.	Missing code for the open questions requiring that the student applies the provided example commands/code.	All requested code is provided for the open questions requiring that the student applies the example commands/code.	Further code is provided, either modifying scripts already included as part of the template, or contributing with new scripts.	25
Results	There are missing results. The student has not run all the exercise commands that are already provided as example.	Missing results for the open questions that require that the student applies the example commands/code.	The results are correct and they answer the open questions.	The student has extended answers with further analyses.	25
Discussion	No discussion provided. Too much syntactical errors. Unsupported conclusions.	Bare enumeration of the results. Some syntactical errors.	Discussion integrates results, maybe integrating further elements from theory sessions, and fulfills the requested length.	Well written discussion integrates results and topics discussed at theory sessions. May include external references.	30

Submissions	Due to the continued assessment, **an unsubmitted exercise scores 0 at the end of the term**.
	Submitting exercises after the required deadline **discounts 5%** of that exercise score.
	First submitted exercise will get a bonus of 5% of that exercise score.
	Continued assessment final score will be computed as the **average of all required exercise submissions**.
